# Tirth Patel

tirthpatel5393@gmail.com  in Tirthpatel  GitHub: tirthpatel90  ▫ tirth.dev  ▫ Ahmedabad

## Education

**LDRP Institute of Technology and Research** June 2023 – present

*Bachelor of Engineering - Information Technology: SPI (5th semester): 8.00* Gandhinagar

*Coursework: Data structures, Operating systems, Computer Networks, Database Management System, Artificial Intelligence, Machine Learning*

## Skills Summary

| | |
|---|---|
| **Languages** | JavaScript, HTML, CSS, Python, C, C++, SQL |
| **Frameworks / Libraries** | React, Node.js, Flask |
| **Tools & Technologies** | Docker, Git, Github, Postman, Github Actions, Kubernetes |
| **Cloud & DevOps** | AWS (EC2, S3), AZURE (Blob Storage, Cosmos DB), CI/CD Pipelines, Oracle |
| **Databases** | PostgreSQL, MySQL, SQLite, Firebase |
| **Core Concepts** | Linux Fundamentals, Networking Basics, OOP, System Design fundamentals |
| **Soft Skills** | Communication, Leadership, Time Management, Problem Solving, Collaboration |

## Experience

**Microsoft Azure Intern** Jan 2026 – Feb 2026

Microsoft India × AICTE Remote

- Completed a 4-week industry focused on Microsoft Azure cloud services fundamentals.
- Gained exposure to cloud computing concepts including virtual machines, storage, networking, and deployment models.
- Developed foundational understanding of cloud architecture, resource provisioning, and enterprise cloud environment using Microsoft Azure Portal.

## Projects

**Data Agnostic MLOps Pipeline** | Link Ongoing

- Developed a modular MLOps pipeline designed to automate data ingestion, preprocessing, and model training workflows across multiple data formats (CSV, Excel, JSON).
- Implemented structured pipeline orchestration with configuration-based execution and designed project architecture following automation and deployment-ready principles aligned with MLOps & DevOps workflows.
- Structured ML pipeline with future containerization support using docker for reproducible execution.

**NAVIQ – Career Guidance Platform** | Link Dec 2025 – Jan 2026

- Developed a career guidance platform providing structured learning roadmaps, study resources, and interview preparation support for multiple technical roles.
- Build backend REST APIs using python flask with SQLite database integration for managing career and learning data.

**Travel Management System** | Link Oct 2025 – Dec 2025

- Developed a backend web app using JavaScript to manage tours, hotels, and booking workflows through RESTful APIs.
- Implemented role-based control for secure user and admin operations and integrated SQLite database schemas to handle booking, user data, and travel management operations efficiently.

## Certifications

- Oracle Cloud Infrastructure (OCI) Foundation Associate – Link
- Oracle Cloud Infrastructure Architecture Associate – Link
- NPTEL–Python for Data Science – Link
